

Step 1: Feed Teaser

Step 2: Insert wormer or medicine into PepperMed

Step 3: Feed!

PEPPERMEDS™

Ideal for administering wormer or medicine to difficult or dangerous horses

PepperMeds is a hollow hard candy flavored with peppermint. Simply add your wormer or medicine of choice to the PepperMed and feed as a treat. Your horse cannot taste the medicine over the strong peppermint flavor.

PEPPERMEDS™

Masks Medicine in a Mega Minty Treat!

Open this end for PepperMed teasers

Step 1

First, give your horse a teaser treat. This will get your horse's palate ready for the real thing. The teasers are the thin solid treats, with a powerful peppermint punch. There are 2 per box.

Step 2

Next, insert your wormer or medicine of choice into a PepperMed candy. Do not overfill. Each PepperMed holds approximately 2 cc's. There are 10 PepperMeds per box.

Step 3

Now, feed your horse a delicious minty treat! For fussy eaters or first timers, place PepperMeds into feed bucket with meal. The strong peppermint flavor will have your horse coming back to finish the treat.
